## The Edwards Embossed Metal Ceilings and Side Walls

In the following pages we show a few of our many correctly and artistically modeled Metal Ceiling and Side Wall Designs.

Having just erected new factories, installed new machinery, and using none but the best grade of steel, with only experienced mechanics to work same, we are turning out a line of plates that are superior in every detail of Construction, Quality and Appearance.

Artistic taste and specially devised machinery have made it possible to use steel for Ceiling and Side Wall decoration. It is more healthful than plaster; does away with dampness in buildings incident to the use of plaster; takes a low rate of insurance, being Fire and Waterproof; very easily applied; it improves the acoustic properties of a room, and by the artistic arrangement of panels and mouldings, offers possibilities of treatment hitherto unattained.

The Edwards Metal Ceilings and Side Walls are made from sheets of mild steel, usually of 28 or 29 gauge. These are given form by being placed between dies and subjected to the action of a powerful machine hammer. By this method the administration of heavy and distinct blows tends to produce sharper angles than when the steel slowly yields to the application of hydraulic pressure.

If you will forward plans or specifications giving dimensions of rooms to be covered, we will prepare a detail drawing showing the arrangement of Plates, Molding, Filler, Cornice, etc., and forward same together with a lump price for sufficient material to erect the ceiling delivered f. o. b. your railroad station.

## FACTS PERTAINING TO

# The Edwards Embossed Metal Ceilings and Side Walls

---

In addition to being highly ornamental and attractive, The Edwards Metal Ceilings and Side Walls possess many characteristics of a decidedly utilitarian nature, which would seem quite sufficient to alone justify their slight increase in cost over lath and plaster.

Closely joined so as to make them easy and economical to install, they present an almost air-tight surface and, being incombustible, they tend to greatly protect floors and woodwork in case of fire, and have many times by preventing the spread of flames until the arrival of the fire department saved buildings from total destruction. Being of light weight they reduce to a minimum the strain upon trusses and joists. They neither crack nor fall as plaster is proven to do, nor shrink and dry out like wood. They do not hold disease germs or vermin and can easily be cleaned with sponge and water.

The field for Metal Ceilings is almost universal and is constantly widening. They are universally used in dwellings, vestibules, apartment houses, bath rooms, kitchens, banks, buffets, restaurants, theaters, public halls, churches, educational institutions, and are largely employed in establishments where heavy goods are handled, the resulting jarring, which would loosen the plaster, producing no effect on the steel sheets.

The Edwards Metal Ceilings and Side Walls will weigh crated about 70 lbs. to the 100 square feet, and are given a priming coat of paint both sides before shipping.

To make the proper finish this should be supplemented by at least two coats of paint, laid on after the Ceiling is erected.

Where much oil is used in the paint the effect is a shiny finish that has a tendency to blunt the sharp appearance of the pattern, making the fact that the ceiling is stamped very obvious.

White Lead and Turpentine with just enough oil to give it a body will produce a flat effect somewhat resembling plaster. This diffuses the light better than a smooth surface and gives the pattern an artistic outline.

## DIRECTIONS FOR MEASURING

First take the actual dimensions of the room in feet and inches, then add to each dimension twice the depth of the Cornice to be used. Add to this 4 inches for variation. For example, take a room the measurements of which are 15 feet 0 inches by 39 feet 0 inches.

If your cornice extends down on the wall 12 inches, add 24 inches to each dimension, and then add 4 inches for variation to each dimension, which is tabulated as follows:

Size of room .....	15 ft. 0 in. x 39 ft. 0 in.
Cornice .....	2 " 0 " x 2 " 0 "
For variation.....	0 " 4 " x 0 " 4 "
Total. ....	17 ft. 4 in. x 41 ft. 4 in.

We now have the dimensions, 17 ft. 4 in. x 41 ft. 4 in.; multiplied, gives the actual number of square feet of metal in the entire ceiling, cornice, etc., namely, 716 square feet. Do not deduct for openings in the ceiling, such as stairways, skylights, elevator openings, etc., unless they exceed 100 square feet each.

The deeper the cornice, the greater the cost of the material. The selection of its depth should be governed by the height of ceiling. For a room 12 ft. high the depth of plate must be considered in making a selection of designs. After the selection has been made and the price agreed upon, multiply the cost of the metal by the square feet in the ceiling. To this must be added the cost of labor for erecting.

DIRECTIONS FOR APPLYING

## Edwards Metal Ceilings and Side Walls

---

Always begin to lay off ceiling at center line and work each way to walls. Strike chalk lines the length of the room at distances shown by lines on working plan which indicate the centers of lapping beads on the plates and mouldings. On these lines nail  $\frac{7}{8}$  x 1 inch furring strips. Cut cross strips to fit between these strips and place them as shown by lines on working plan. Nail strips in angle of ceiling and wall at a distance from wall equal to the projection of the cornice to receive the cornice brackets. Strips should be brought to a level by driving wedges between the strips and old ceiling or joists, or the ceiling will present an uneven appearance when finished.

The Field should be applied first, then the Cornice, Mold, and last, the Filler. The Filler is always sent 1 or 2 inches wider than the dimensions of the room call for, to provide for any unevenness in the walls. Place the bead on the filler so as to cover the flange on the cornice and slip the other side of filler under the bead on the mold, then nail the mold tight. Use a sharp punch for making nail holes where there are more than two thicknesses of metal. Close or swedge with a small dull tool any joints which may not have lapped tightly.

## SPECIAL NOTICE

With every Metal Ceiling sold we furnish a drawing showing the arrangement of Metal, also a packing slip which contains an itemized list of all material, together with catalogue number and size of each piece; the Bill of Lading shows in how many crates or boxes the material was shipped, therefore the first thing to do upon receipt of ceiling material is to see that you have the proper number of crates and boxes. The contents of each crate should be inspected and counted, and with our catalogue and drawing to guide you, check off the items on packing slip.

All our ceiling material is CHECKED and COUNTED TWICE before leaving our house, but should any mistake or shortage exist in the original shipment, we will, upon being notified, make correction; provided, however, that notice is given BEFORE you start to erect ceiling. The next step will be to thoroughly examine and make yourself familiar with the arrangement of the ceiling as shown on drawing. This drawing is usually drawn to a one-quarter inch scale; that is, every quarter inch on the drawing represents a foot of the actual size of the room. This drawing is always made strictly in accordance with the measurements and information furnished us; therefore, should there be a mistake of any kind in this drawing, we should be notified before you start to erect ceiling.

The goods shipped will cover the space shown on drawing, but no more. If any waste is caused by mis-cutting, or if the measurements you furnished were not correct and more material is needed, we will only charge for same at pro rata, express or freight charges added.

Furring Strips can be applied over Old Plaster,  
direct to Joist or Wood Ceiling.

## ROMANESQUE.

No. 1603—Ceiling Plate.  
Size, 24 x 24 in.  
24 x 48 in.  
24 x 96 in.

LIST PRICE, \$10.00 PER 100 SQUARE FEET.

No. 1625—Border Plate.  
Size, 24 x 24 in.  
24 x 48 in.

LIST PRICE, \$11.25 PER 100 SQUARE FEET.

No. 1613—Ceiling Plate.  
Size, 24 x 24 in.  
24 x 48 in.  
24 x 96 in.

LIST PRICE, \$11.25 PER 100 SQUARE FEET.

No. 1643—Romanesque Cornice. Projection, 9 in.; Depth, 12 in.; Length, 48 in.  
LIST PRICE, 22½c PER LINEAL FOOT.

No. 1649—Romanesque Cornice. Projection, 2 in.; Depth, 4 in.; Length, 48 in.  
LIST PRICE, 7½c PER LINEAL FOOT.

No. 1619—Romanesque Filler Plate. Width, 8 to 24 in.; Length, 48 to 96 in.  
LIST PRICE, \$8.75 PER 100 SQUARE FEET.

No. 1643-A.  
Inside Cornice Block.  
Size, 9 x 12 in.  
List Price, 62½c each.

No. 1643-B.  
Outside Cornice Block.  
Size, 9 x 12 in.  
List Price, 62½c each.

No. 1639—Romanesque Wainscot Plate.  
Size, 24 x 33 in.  
LIST PRICE, \$11.25 PER 100 SQUARE FEET.

No. 1638—Romanesque Side Wall Plate.

Size, 24 x 48 in.

24 x 72 in.

24 x 96 in.

LIST PRICE, \$10.00 PER 100 SQUARE FEET.

No. 1629—Romanesque Wainscot Rail.

Height, 4 in.; Projection, 1 1/4 in.; Length, 48 in.

LIST PRICE, 6 1/4c PER LINEAL FOOT.

No. 1700—Romanesque Mold.

Width, 6 in.; Depth, 1 in.; Length, 48 in.

LIST PRICE, 7 1/2c PER LINEAL FOOT.

No. 1701—Ell.

Size, 6 x 6 in.

List Price, 6 1/4c each.

No. 1702—Tee.

Size, 6 x 6 in.

List Price, 6 1/4c each.

No. 1703—Cross.

Size, 6 x 6 in.

List Price, 6 1/4c each.

No. 1627-C—Romanesque Center.

Size, 48 x 48 in.

Composed of four No. 1627 Plates.

LIST PRICE, \$1.82 EACH.

No. 1786—Zinc Ventilating Center.  
Diameter, 40 in.; Projection, 12 in.  
NET PRICE, \$7.50 EACH.

No. 1787—Zinc Ventilating Center.  
Diameter, 24 in.; Projection, 12 in.  
NET PRICE, \$4.00 EACH.

ROMANESQUE.  
Design No. 1903.

Composed of Ceiling Plates 1603, Border Plates 1625-27, Filler 1640, Cornice 1643.

List Price based on Room 20 x 60 feet, \$11.07 per 100 Square Feet.

## CEILINGS, PLATES, MOULDINGS, CORNICE, ETC.

French Renaissance	Pages	9 to 48	Rococo	Pages	129 to 144
Italian Renaissance	"	49 to 60	Greek	"	145 to 154
Colonial	"	61 to 94	Modern	"	155 to 166
Gothic	"	95 to 118	Interiors	"	167 to 184
Romanesque	"	119 to 128			

QUESTIONS AND COMMANDS	CODE	ANSWERS	CODE
When can you ship?	Tackle	We can ship	Tornado
When will you ship?	Tadpole	We will ship	Tower
Have you in stock?	Tandem	We have shipped	Tramp
Can you ship promptly?	Tavern	We will accept order	Tremor
How soon can you ship?	Temper	We have none in stock	Triangle
Have you shipped order?	Theory	We have written particulars	Trinity
Ship at once by freight	Thorn	We have all in stock except	Trunk
Ship at once by express	Thread	You may substitute	Tunnel
Write lowest price at which you can sell	Throne		
Telegraph lowest price which you can sell	Thunder		
Wanted at once. Telegraph when will ship	Toast		
May we substitute?	Tomato
